we begin!«**

MICRO-TURNED PARTS

FOR PRECISION ENGINEERING AND MEDICAL ENGINEERING

CARL HAAS has decades of expertise in the manufacture of micro-turned parts – the smaller, the better – in small and micro dimensions. The customers for our micro-turned parts come mainly from the measuring equipment industry, the watchmaking industry and the medical engineering sector.

Our micro-turned parts at a glance

Precision micro-turned parts ranging from
Ø 0.2 mm to Ø 4.0 mm

Finishing of micro-turned parts

- » Heat treatment
- » Barrel finishing
- » Polishing
- » Sand blasting and shot peening
- » Coating

Materials used for micro-turned parts

- » Stainless steel - e.g. 1.4305, 1.4104, 1.4101
- » Aluminium
- » Titanium
- » Non-ferrous metals
- » Machining steel
